Objective

Eager to leverage my extensive experience in Full Stack Development for the role of Software Engineer at Salesforce. With a strong background in Node, Express, and MongoDB on AWS and Azure platforms, I excel in creating high-performance, responsive frontend designs using Vue, Svelte, and vanilla JavaScript. My proficiency in UI performance optimization, coupled with my experience in scalable third-party integrations, positions me as an ideal candidate to contribute significantly to Salesforce's Commerce Cloud platform.

Skills

Programming Languages & Frameworks:

JavaScript, Vue, Svelte, React, Node.js, Express, MongoDB, PHP, SASS, TypeScript.

Performance Optimization:

Proficient in frontend performance optimization, responsive design, and efficient code practices.

Cloud Platforms:

AWS, Azure - extensive experience in developing and managing high-performance serverless applications.

UI/UX Design:

Adept in creating user-focused interfaces

Development Tools:

GitHub Actions, Figma, Asana, Notion.

Work Experience

Front End Developer

Olukai, Mar 2022 - Present

- Specialized in scalable third-party integrations, enhancing UI performance and responsiveness.
- Led project planning, focusing on selecting tools and platforms for optimal UI performance.
- Managed serverless AWS applications, improving front-end performance for brand APIs.
- Developed a loyalty program app and customer identification app with a strong focus on frontend efficiency and performance.
- Collaborated closely with design and marketing teams to optimize front-end requirements for speed and user experience.
- Utilized Vue, Svelte, and vanilla JavaScript to develop high-performance frontend applications.
- Implemented efficient DevOps practices using GitHub Actions, enhancing team productivity and application performance.

Fullstack Developer

Bryt Designs, Sep 2018 – Mar 2022

- Developed private Shopify apps, focusing on backend functionality with efficient frontend performance.
- Integrated a personalized quiz component with Klaviyo, optimizing for user interaction and performance.
- Implemented a loyalty program with Yotpo's REST API, emphasizing UI performance and user data management.
- Developed responsive sites on WordPress and Shopify, utilizing JavaScript, PHP, and SASS for optimal performance.
